RESEARCH EXPERIENCE

Large zoom-in simulation of a galaxy cluster

2019–now

- Supervised by Prof. Suhyoung K. Yi. Playing a primary role in the design and execution of NewCluster project, a high-resolution cosmological zoom-in simulation of a galaxy cluster.

Code Development for Simulations

2019–2023

- Developed RAMSES-yOMP, a modified version of the hydrodynamic simulation code RAMSES that features performance enhancement and chemical/dust evolution.
- Developed an efficient reading and imaging package for RAMSES output based on NumPy.

Velocity dispersion profiles of galaxies

2021–2023

- Supervised by Prof. Suhyoung K. Yi. Compared simulations and IFU observations to reconcile the origin of the various velocity dispersion profiles of galaxies.

Preprocessing of dark halos in clusters

2017–2018

- Supervised by Dr. Rory Smith and Prof. Suhyoung K. Yi. Used a cosmological simulation of galaxy clusters to quantify the impact of preprocessing on the population of dark halos in galaxy clusters.
