RESEARCH EXPERIENCE

Large zoom-in simulation of a galaxy cluster   **2019–now**
– Supervised by Prof. Sukyoung K. Yi. Playing a primary role in the design and execution of New-Cluster project, a high-resolution cosmological zoom-in simulation of a galaxy cluster.

Code Development for Simulations   **2019–2023**
– Developed RAMSES-yOMP, a modified version of the hydrodynamic simulation code RAMSES that features performance enhancement and chemical/dust evolution.
– Developed an efficient reading and image drawing package for RAMSES output based on numpy.

Velocity dispersion profiles of galaxies   **2021–2023**
– Supervised by Prof. Sukyoung K. Yi. Compared simulations and IFU observations to reconcile the origin of the various velocity dispersion profiles of galaxies.

Preprocessing of dark halos in clusters   **2017–2018**
– Supervised by Dr. Rory Smith and Prof. Sukyoung K. Yi. I used a cosmological simulation of galaxy clusters, YZiCS, to quantify the impact of preprocessing on the population of dark halos in galaxy clusters.
